Eivissa collection

design Ludovica + Roberto Palomba.

it / I padiglioni Eivissa sono moduli abitativi progettati per creare ambienti protetti dal sole, dal vento o dalla pioggia, che si inseriscono nel paesaggio naturale come architetture contemporanee e funzionali. Vere e proprie stanze a cielo aperto in cui apprezzare l'esterno in pieno comfort. Con una solida struttura in alluminio, ogni padiglione diventa unico grazie alla scelta dei colori, delle coperture, dei pavimenti e degli accessori che lo vestono e lo decorano.

en / Eivissa pavilions are living modules designed to create spaces that provide shelter from the sun, wind and rain, contemporary functional pieces of architecture that fit into natural settings. Real open-air rooms in which to enjoy outdoor living in total comfort. With a robust structure in aluminium, each pavilion can be made exclusive thanks to a wide choice of colours, roofs, floors and perimeter and decorative accessories.

fr / Modules d'habitat conçus pour créer des espaces protégés du soleil, du vent et de la pluie, les pavillons Eivissa s'intègrent dans le contexte paysager comme des ouvrages architecturaux à la fois contemporains et fonctionnels. De véritables pièces à ciel ouvert, idéales pour apprécier le plein air sans renoncer à aucun confort. Doté d'une structure en aluminium solide, chaque pavillon devient exclusif de par le choix des couleurs, des revêtements, des planchers et des accessoires qui l'habillent et le décorent.

Eivissa Climate

it / Eivissa Climate è una struttura bioclimatica con copertura a lamelle orientabili motorizzate. Questa soluzione risponde in modo sofisticato e funzionale ad esigenze modulabili di luce, ombra, impermeabilità e ventilazione creando al suo interno un clima e un'ombreggiatura ideali e offrendo una buona protezione dalle intemperie.

en / Eivissa Climate is a bioclimatic structure with roof in adjustable motorised louvers. This solution is a sophisticated, practical answer to variable requirements for light, shade, waterproofness and ventilation, creating the ideal climate and shade inside and offering good protection against the elements.

fr / Eivissa Climate est une structure bioclimatique dotée d'une couverture à lames orientables motorisées. Cette solution répond de manière sophistiquée et fonctionnelle aux besoins modulaires de lumière, d'ombre, d'imperméabilité et de ventilation, car elle est en mesure de créer un climat et un ombrage idéaux, et d'offrir une bonne protection contre les intempéries.

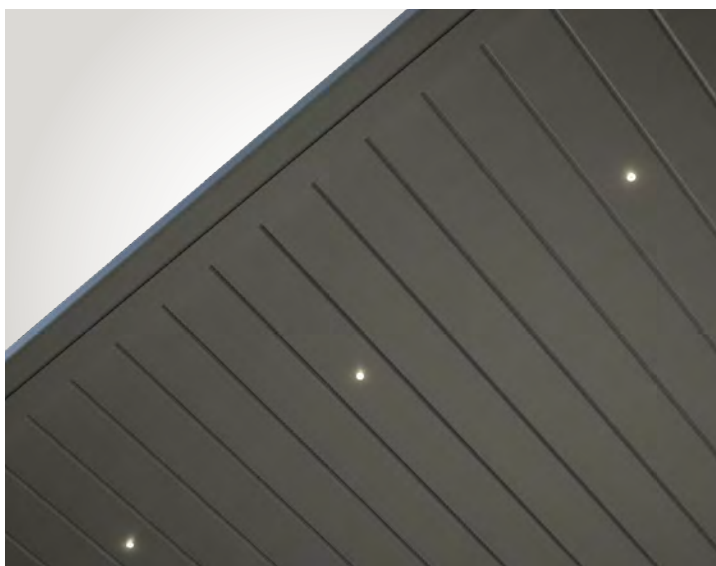

Eivissa

Climate

it / Il padiglione Eivissa con copertura bioclimatica è dotato di un tetto con lamelle di alluminio che possono essere orientate elettricamente da 0° a 90°. Le lame non completamente aperte consentono un piacevole passaggio dell'aria e schermano la luce diretta del sole, mentre la loro completa chiusura ripara perfettamente l'ambiente sottostante dalla luce e dalla pioggia, che defluisce nei pluviali integrati. Eivissa Climate può diventare uno spazio unico e riservato grazie anche alla possibilità di applicare su tutti i lati vetrate scorrevoli e tende.

en / The Eivissa pavilion with bioclimatic roof is fitted with aluminium louvers that can be electrically adjusted from 0° to 90°. Left slightly open, these louvers provide pleasant ventilation and shield against direct sunlight. When completely closed, they shelter the underlying space against the light and the rain, which runs off into the built-in drainpipes. Eivissa Climate can be turned into a unique, private space thanks also to the option of adding sliding glass panels and curtains on all the sides.

fr / Le pavillon Eivissa à couverture bioclimatique est doté d'une toiture à lames en aluminium qui peuvent être orientées électriquement de 0° à 90°. Quand elles ne sont pas complètement ouvertes, les lames permettent une agréable circulation d'air tout en protégeant de l'ensoleillement direct, en revanche, lorsqu'elles sont totalement fermées, elles abritent parfaitement le milieu environnant de la lumière et de la pluie, évacuée via des gouttières intégrées. Eivissa Climate peut devenir un espace unique et intime grâce aussi à la possibilité d'appliquer, sur tous les côtés, des panneaux vitrés coulissants et des rideaux.

Eivissa
Light & Proof

Ethimo / Outdoor decor

The italian style for outdoor living

Eivissa Light & Proof

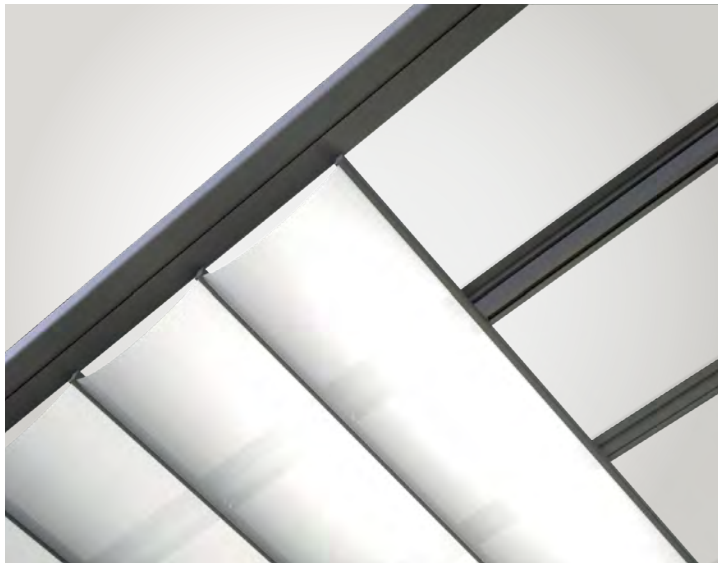

it / Eivissa Light & Proof crea una stanza a cielo aperto, protetta dalla pioggia e dalle intemperie, all'insegna della funzionalità e dello stile. Un ambiente affascinante, uno spazio protetto ed accogliente, per vivere in continuità con la natura.

en / Eivissa Light & Proof creates an open-air room, sheltered against the rain and inclement weather, that is both practical and stylish. A very attractive, sheltered, welcoming space in which to enjoy outdoor living.

fr / Eivissa Light & Proof crée une pièce en plein air, protégée de la pluie et des intempéries, alliant fonctionnalité et style. Une ambiance fascinante, un espace protégé et accueillant, pour vivre en continuité avec la nature.

Eivissa Light & Proof

it / Il padiglione Eivissa Light & Proof è dotato di una copertura fissa in polycarbonato compatto che garantisce una perfetta impermeabilità. Sotto la copertura, disponibile nelle due varianti Light e Fumé, è possibile montare una tenda scorrevole in tessuto ombreggiante per schermare l'ambiente dal sole. Tutto il perimetro può essere completato con vetrate scorrevoli o morbide tende.

en / The Eivissa Light & Proof pavilion has a fixed roof in compact polycarbonate that guarantees perfect waterproofness. A sliding fabric canopy, in one of two variants Light and Fumé, can be added under the roof, to provide shade from the sun. The whole perimeter can be completed with sliding glass panels or soft curtains.

fr / Le pavillon Eivissa Light & Proof est doté d'une couverture fixe en polycarbonate compact garantissant une imperméabilité parfaite. Il est possible de monter sous celle-ci (disponible en deux versions : Light et Fumé) un rideau coulissant en tissu d'ombrage pour protéger le pavillon du soleil. L'ensemble du périmètre peut être complété par des panneaux vitrés coulissants ou des rideaux souples.

Eivissa

Open Air

it / Il padiglione Eivissa Open Air è privo di coperture strutturali impermeabili. Il tetto superiore può essere lasciato totalmente libero oppure può prevedere una copertura in lamelle fisse di teak con finitura decapata. Sul soffitto interno può essere montata, in entrambi i casi, una tenda scorrevole in tessuto, per ombreggiare e creare un ambiente fresco e riparato. I lati possono essere completati con tende scorrevoli in tessuto o pannelli decorativi in corda intrecciata.

en / The Eivissa Open Air pavilion has no waterproof roof structure. The external roof can be left completely free or fitted with fixed teak louvers in a pickled finish. In both cases a sliding fabric canopy can be fitted to the roof lining, to provide shade and create a cool sheltered space. The sides can be completed with sliding curtains in fabric or decorative panels in woven rope.

fr / Le pavillon Eivissa Open Air ne présente pas de toiture imperméable. Le toit supérieur peut être laissé complètement libre, ou être recouvert de lames fixes en teck avec une finition décapée. Dans les deux cas, il est possible de monter au plafond un rideau coulissant en tissu afin d'ombrager l'espace et d'obtenir ainsi fraîcheur et protection. Les côtés peuvent être complétés par des rideaux coulissants en tissu ou des panneaux décoratifs en corde tressée.

Eivissa. Dimensioni e pavimenti.
Dimensions and flooring.
Dimensions et planchers.

Padiglione con base e pavimento / Pavilion with base and flooring / Pavillon avec base et planchers

it / Ogni padiglione Eivissa può essere completo di base pavimentata, oppure installato direttamente a terra con opportune staffe di fissaggio. La base di alluminio, in cui è inclusa la pedana, è parte integrante del design del padiglione e permette di sollevarlo dal pavimento sottostante creando una cellula abitativa isolata e ben definita. La pedana può ospitare una pavimentazione a doghe di teak massello o in lastre di ceramica con effetto pietra di diversi colori. Nelle versioni con base possono essere applicate anche le guide per le vetrate scorrevoli.

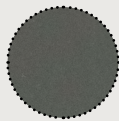

en / Every Eivissa pavilion can be completed with a flooring base or installed directly on the ground using suitable fixing brackets. The aluminium base that supports the platform is built into the pavilion, raising it from the ground to create an insulated, well-defined living unit. The platform can be finished with solid teak decking or stone-effect ceramic tiles in a range of colours. The versions with a base can also be fitted with floor guides for the sliding glass panels.

fr / Tous les pavillons Eivissa peuvent être équipés d'une base et d'un plancher, ou être installés directement sur le sol avec des supports de fixation appropriés. La base en aluminium, qui comprend l'estrade, fait partie intégrante de la conception du pavillon et permet de le soulever du plancher sous-jacent, créant ainsi un espace de vie isolé et bien défini. L'estrade peut accueillir un plancher de lattes de teck massif ou de dalles de céramique effet pierre de différentes couleurs. Dans les versions avec base, il est également possible d'installer des rails de guidage pour les panneaux vitrés coulissants.

Dimensioni / Dimensions / Dimensions

Pavimenti / Flooring / Planchers

it / Il pavimento in teak è composto da doghe di legno massello di spessore 19 mm, lunghe 120 cm e larghe 12 cm. Le doghe hanno superficie liscia e sono preventivamente trattate contro macchie e sporco. Il montaggio è semplice e veloce e viene effettuato su supporti regolabili in altezza per consentire il migliore adattamento al fondo sottostante.

en / The teak decking is made from solid wood slats, 19 mm thick, 120 cm long and 12 cm wide. The slats are smooth and already treated to resist stains and dirt. They are simple and quick to assemble on supports that can be adjusted in height to give perfect results on the underlying base.

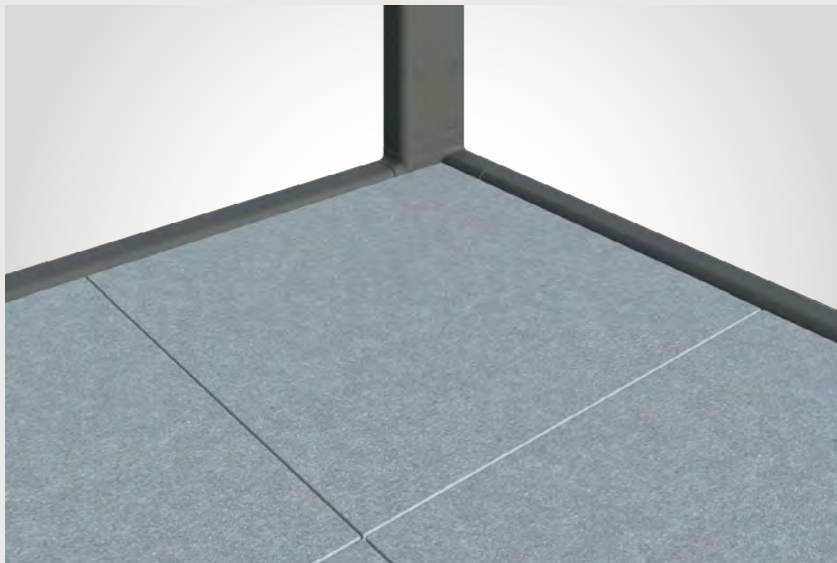

fr / Le plancher en teck est composé de lattes de bois massif de 19 mm d'épaisseur, 120 cm de longueur et 12 cm de largeur. Les lattes ont une surface lisse et sont préalablement traitées contre les taches et la saleté. La pose est simple et rapide, et s'effectue sur des supports réglables en hauteur, ce qui permet une meilleure adaptation au fond sous-jacent.

Materials

Solid Teak

Pavimenti / Flooring / Planchers

it / La pavimentazione in pietra ceramica è composta da mattonelle di gres con finitura effetto pietra di dimensioni 60 x 60 cm e spessore 10 mm. La posa avviene su supporti regolabili in altezza per consentire il migliore adattamento al fondo sottostante. Le mattonelle di pietra ceramica sono disponibili nei tre colori White, Grey e Black Vulcano.

en / The ceramic stone flooring comprises porcelain tiles with a stone-effect finish, 60 x 60 cm and 10 mm thick. They are simple and quick to lay on supports that can be adjusted in height to give perfect results on the underlying base. These ceramic stone tiles are available in three colours: White, Grey and Black Vulcano.

fr / Le dallage en céramique est composé de carreaux de grès effet pierre mesurant 60 x 60 cm avec une épaisseur de 10 mm. La pose s'effectue sur des supports réglables en hauteur, ce qui permet une meilleure adaptation au fond sous-jacent. Les carreaux de céramique sont disponibles en trois couleurs : White, Grey et Black Vulcano.

Padiglioni senza base

/ Pavilion without base

/ Pavillon sans base

it / Ogni padiglione Eivissa può essere installato direttamente a terra, se il fondo lo consente, e fissato con opportune staffe. La scelta di un modello senza la base e il pavimento non pregiudica né la selezione dei tipi di coperture, né la possibilità di applicare tutti gli accessori perimetrali come vetrate o tendaggi. In particolare per il montaggio delle vetrate, le guide di scorrimento saranno fissate direttamente al suolo su cui poggiano i pilastri.

en / Every Eivissa pavilion can be installed directly on the ground, if suitable, using suitable fixing brackets. Models without bases or floors can still be fitted with a selection of roofs, and all the perimeter accessories, such as glass panels or curtains. The floor guides for the glass panels will be fixed directly in the ground where the uprights rest.

fr / Tous les pavillons Eivissa peuvent être installés directement au sol, si le fond le permet, et être fixés au moyen de supports appropriés. Le choix d'un modèle sans base et sans plancher n'affecte pas le choix des types de couverture, ni la possibilité d'appliquer tous les accessoires latéraux comme les panneaux vitrés ou les rideaux. En particulier pour le montage des panneaux vitrés, les rails de guidage seront fixés directement sur le sol où reposent les piliers.

completamento.

Complementary elements.

Éléments complémentaires.

Tenda scorrevole Flow/ Flow sliding canopy / Rideau coulissant Flow

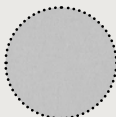

it / Al soffitto di ogni padiglione Eivissa può essere applicata una tenda Flow scorrevole, con funzione ombreggiante e decorativa. La facilità di scorrimento di Flow, la rende estremamente funzionale. I tessuti pesanti e corposi creano un'ombreggiatura fresca e piacevole. È un accessorio compatibile con ogni modello di padiglione e può essere installato anche senza ulteriori coperture protettive (come nel modello Open Air).

en / A sliding canopy can be fitted to the ceiling of any Eivissa pavilion to provide shade and decoration. Flow slides extremely easily, making it highly practical. Heavy, full fabrics create cool, pleasant shade. This accessory is compatible with all Eivissa pavilions and can also be installed without any protective roof (on the Open Air model for example).

fr / Il est possible d'équiper le plafond de tous les pavillons Eivissa d'un rideau coulissant à la fois décoratif et utile pour créer de l'ombre. Flow, grâce à son extrême facilité de coulissement, est extrêmement fonctionnel. Les tissus lourds et épais créent une ombre fraîche et agréable. C'est un accessoire compatible avec n'importe quel modèle de pavillon, qui peut également être installé sans couverture de protection supplémentaire (comme dans le modèle Open Air).

Pannelli vetrati / Glass panels / Panneaux vitrés

it / Le pareti laterali dei padiglioni Eivissa possono essere chiuse con pannelli in cristallo temperato, creando un ambiente totalmente isolato dall'esterno. L'apertura e la chiusura sono facilitate dalla presenza di una maniglia in alluminio incassata nel pannello, che permette a ciascun elemento di scorrere in modo fluido, sovrapponendosi l'uno sull'altro. Le vetrate scorrevoli possono essere applicate sia sulla struttura con base, che in quella poggiata direttamente a terra. All'interno delle vetrate, possono essere montate le tende in tessuto.

en / The sides of Eivissa pavilions can be closed with tempered glass panels that slide over each other to create a totally isolated space. A steel handle set into each panel makes them easy to open and close. These sliding glass panels can be fixed to both structures with bases and those standing directly on the ground. Fabric curtains can be fitted inside the panels.

fr / Les parois latérales des pavillons Eivissa peuvent être fermés par des panneaux de verre trempés qui se déplacent coulissant l'un sur l'autre, créant un espace totalement isolé de l'extérieur. L'ouverture et la fermeture sont facilitées par la présence d'une poignée en acier encastrée dans le panneau. Les panneaux vitrés coulissants peuvent être posés aussi bien sur la structure avec base que sur celle qui repose directement sur le sol. Des rideaux en tissu peuvent être installés à l'intérieur des panneaux vitrés.
